Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

The Applicant's arguments have been reviewed in support of traversing the restriction requirement, however, the arguments are directed to US Restriction practice. The outstanding restriction is based on a lack of unity requirement, as such, the arguments presented are not on point. The lack of unity is based on a special technical feature being alleged and the examiner is required to list the various claims and the specific technical feature of that claim. As such, the restriction is made final.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 38, 42-47 and 58 are rejected under 35 U.S.C. 102(b) as being anticipated by *Meyn (US Patent 5,269,721)*.

Meyn teaches an unloading station for unloading the poultry from at least one holder, a connecting station for connecting the poultry to carriers and a conveying station for conveying the poultry as a stream of poultry from the unloading station to the connecting station, and at least one control device is constructed to control the number of birds transferred to the unloading station to the conveying station. The conveying station as seen in the figure includes a number of conveyor device arranged in parallel

and a number in series. Regarding claims 45 and 47, the control device reduces fluctuations in the stream of poultry.

Conclusion

Summary: Claims 38, 42-47 and 58 are rejected.
